About the C2C Materials

The Queensland Department of Education *Curriculum into the Classroom* (C2C) resource is a comprehensive package of materials designed to support implementation of the F (Kindergarten) – 10 Australian Curriculum. C2C has been made available for ACT teachers to adopt or adapt elements to suit local school contexts and students’ needs.

Adopting and Adapting the C2C Materials

In the ACT, the Australian Curriculum website remains the core reference point for information about the curriculum. The C2C materials may support teachers and curriculum leaders to plan for curriculum delivery at the whole-school level, year level and classroom level. The materials can be used as is, or can be adapted or modified by adding to, removing, editing or re-ordering content.

C2C materials are not intended to replace successful initiatives, programs or approaches schools currently have in place.

The C2C curriculum package consists of three levels of planning:

- Year level plans and Band plans
- Unit plans and supporting material
- Lesson plans and resources
C2C materials

**Level 1 Planning**

Year level and Band plans provide an overview of the content descriptions, achievement standards and assessments in each unit of work over the year or Band. This level may be used to assist with whole-school planning.

**Level 2 Planning**

Unit plans assist in classroom planning and include teacher lessons or topic overviews and assessment materials which are linked to the Australian Curriculum. Unit plans align content descriptions, achievement standards, assessments and suggest a sequence of teaching and learning. They also identify resources that may support delivery of content.

**Level 3 Planning**

Lesson plans or topic outlines describe lesson objectives supported by example learning sequences and resources.

**Accessing C2C Materials**

ACT school teachers are able to access the full suite of C2C materials in Scootle via the Digital Backpack. There are currently 247 packages available in English, Mathematics, Science, Technologies, Health and Physical Education, Economics and Business, and Civics and Citizenship. Additional packages will be uploaded in due course.

To access the materials, teachers need to download the package from Scootle. All files must then be extracted and consist of two key folders:

1. A Unit folder contains the Unit plan, Teacher lesson overviews and Topic overviews, Lesson plans and Topic outlines.

2. A Resources folder which is divided into:
   a. Assessment - C2C provides a range of assessment, monitoring tools and resources that are aligned to the content descriptions of each unit
   b. Documents - containing the Year level and Band plans, mapping documents, teacher resources and resources for students
   c. Videos.

C2C materials are presented in MS Word format to allow for flexible use.

© C2C materials are used with the approval of the State of Queensland (Department of Education Training and Employment) 2014
