

Primary and Secondary Teachers

Developing Problem Solving Skills

Open for registration now
Course available from 3 Aug-31 Dec

Recognised as a 21st century skill, teachers are implored to help students to grow good problem-solving abilities. This professional learning provides teachers with the tools and understanding to help their students to develop problem-solving skills and become thinkers of the future.

Professional Standards – Proficient Teacher Standards

1.2.2 Structure teaching programs using research and collegial advice about how students learn

3.1.2 Set explicit, challenging and achievable learning goals for all students

Instructions for using the Open Learning Australia platform

1. Copy and paste the URL into your search engine and the landing page should appear.
2. Click join now. Enter your details to access the Open Learning platform.
3. Enter the access code given for this course. The access code is case sensitive.
4. Four pre-enrolment questions will be asked; full name, TQI number, email and your school. These questions are so we can accredit TQI hours to you. All questions require a response, including a correct email address in case we need to contact you if something goes wrong in the process of uploading your hours.
5. 'Join' the course. The course will be available any time after the 3 August and if you register before this date, a reminder email will be sent to you.
6. Work through the modules at your own pace and complete before 31 December. You can return anytime by visiting the Open Learning website and typing in the user name and password that you created in step 2. (www.openlearning.com)
7. On completion, click on "You are Awesome!" button to download your certificate.
